Experience

I have practiced creating various web development projects, demonstrating my ability to build dynamic and user-friendly applications. With over three years of teaching experience in diverse fields , I possess strong communication, collaboration, and problem-solving skills, thriving in team environments and delivering impactful solutions.

Education

Advanced Levels (A-Levels)
- Institution: The City School
- Year: 2019
- Achievement: High Achiever

PIAIC
Present- Learning Agentic AI

Projects

E-Com Shopping App
- Purpose: connects external APIs to display range of products.
- Your Role: Designed & developed the frontend using React and TypeScript; integrated backend APIs with Node.
- Technologies Used: React, Tailwind CSS.
- Git Repo: https://github.com/sakinaahmed100/shop_ecom/

Weather App
- Purpose: A web application that fetches and displays real-time weather data for any city.
- Your Role: Built the application's user interface and consumed third-party APIs for data retrieval.
- Technologies Used: React, Axios, API Integration
- Git Repo https://github.com/sakinaahmed100/weatherapp

Movie Website
- Purpose: Showcasing movie information and user reviews.
- Your Role: Designed a responsive layout and implemented dynamic rendering of movie data.
- Technologies Used: Next JS
- Git Repo: https://github.com/sakinaahmed100/movie_web
